Subtraction Meanings

Dawn received a total of 12 stars on Monday and Tuesday.
She received 7 of the stars on Monday. How many stars did
she receive on Tuesday?

You can draw a picture to find how many stars Dawn received
on Tuesday.

First, draw 12 stars.

Next, put a line through the 7 stars that Dawn received Monday.

Count the number of stars that are not crossed off.

There are 5.

So, $12 - 7 = 5$.

You can add to check subtraction: $7 + 5 = 12$, so $12 - 7 = 5$.

Dawn received 5 stars on Tuesday.

Find each difference. Make a drawing to help you.

1. $13 - 4 =$ _____ 2. $16 - 9 =$ _____ 3. $15 - 7 =$ _____

4. $11 - 6 =$ _____ 5. $12 - 8 =$ _____ 6. $14 - 5 =$ _____

7. **Estimation** There are 21 players on the Titans baseball team.

Only 9 players can play at any one time. About how many
players are not playing? _____

8. An octagon has 8 sides. A pentagon has 5 sides.

How many more sides does an octagon have than
a pentagon? _____
