# Fact Families with 2, 3, 4, and 5
You can use multiplication facts to help you find quotients.

Example 1
Darren and Molly have 16 sheets of paper to share. Each will get the same number of sheets of paper. How many sheets will each get?

Example 2
Peter has 24 pennies. He puts the pennies into 4 equal rows. How many pennies are in each row?

What You Think	What You Write	What You Think	What You Write
2 times what number equals 16? $2 \times \mathbf{8} = 16$	$16 \div 2 = \mathbf{8}$ Darren and Molly will each get 8 sheets of paper.	4 times what number equals 24? $4 \times \mathbf{6} = 24$	$24 \div 4 = \mathbf{6}$ Peter has 6 pennies in each row.

Find each quotient.

1. $14 \div 2$ **2.** $35 \div 5$ **3.** $15 \div 3$ **4.** $32 \div 4$ **5.** $24 \div 3$

_____ _____ _____ _____ _____

6. $2\overline{)12}$ **7.** $3\overline{)27}$ **8.** $5\overline{)25}$ **9.** $4\overline{)20}$ **10.** $4\overline{)36}$

11. Write a fact family using the numbers 5, 6, and 30.
