Position and Motion

Key Concept What is the difference between distance and displacement?

Directions: The diagram above represents an oval race-car track. Use the diagram to answer each question or respond to each statement.

- 1. When a race car reaches point B on the first lap, what is its distance traveled and its displacement?
- **2.** When the car reaches point C on the first lap, what is its distance traveled and its displacement?
- **3.** When the car reaches point D on the first lap, what is its distance traveled and its displacement? (Hint: Use a ruler.)
- **4.** If a race is 10 laps, what is the car's distance traveled and its displacement when it reaches the finish line?
