Chapter 7	ļ	Using Science Skills: Identifying patterns

Bond Identification

1. When atoms share electrons to fill their outermost energy levels, they formbonds.	1. V	When atoms share electrons to fill their outermost energy levels, they form
--	------	---

- 2. When atoms transfer electrons to fill their outermost energy levels, they form _____bonds.
- **3.** Indicate whether the atoms listed below will share electrons or transfer electrons. (Hint: When electrons are transferred, *both* atoms will have complete outermost energy levels. Otherwise, atoms share electrons.)

$$\mathbf{c}.\ \cdot\dot{\mathbf{C}}\cdot\ +\ \cdot\ddot{\mathbf{O}}:$$

$$\mathbf{f.} : \ddot{\mathbf{S}} \cdot + \cdot \ddot{\mathbf{O}} : + \cdot \ddot{\mathbf{O}} :$$

4. Write the chemical formula and the electron dot model for each of the products in question 3. If ions are formed, show the electric charge on each.
